

Front End Developer Challenge

Welcome to the next stage of the selection process.

Let's see if you'll accept this challenge!

We would like to know if you're able to turn the Figma design provided below into a working webpage.

The following requirements must be met:

- Use the latest version of **HTML, CSS, and JS**
- Utilize the **CSS framework Bootstrap** in combination with pure **CSS**
- Use **jQuery** and pure **JS** only if necessary
- Pay close attention to **Core Web Vitals** for optimal website performance
- Ensure the website is **SEO-friendly**

Please note that we do not provide a mobile design, but the page should be **responsive** and **mobile-friendly**.

Bonus points will be awarded if you are able to implement this template in the **CodeIgniter framework**.

For the database, you can use **JSON files**

At the end please write a readme with a brief explanation of the project, the technology you use, and set up instructions if you use **Codeigniter**. Please upload your finished project to GitHub Pages and share the links to both your GitHub Pages and GitHub repository.

We appreciate your efforts and look forward to reviewing your work. If you have any questions or concerns, please do not hesitate to reach out.

Materials

Design: <https://www.figma.com/file/rnqGoCJqAd7IPrPgYwkEmT/Test-Design?node-id=0%3A1&t=MvcfTYC4OogclTHU-1>

You can copy the design into your own Figma account. It'll allow you to edit it.
